FirstWatch provides Oceanside crime analysts with a free-text sentinel tool to help them quickly receive alerts on key words or phrases contained in notes/comments received during the call-taking process. The text tool provides investigators with a dynamic way to target specific events and situations (on-the-fly) that are not normally classified during the initial report. Searching through notes/comments from an incident, the trigger can automatically look for information relating to gang activity, partial license plates, information on wanted vehicles, amber alerts, pursuits and more. One of the key real-time benefits of FirstWatch Free Text Trigger is that investigators can deploy or update new analysis/surveillance criteria in a matter of minutes.
